### **TeleSource Recognized as AT&T Solution Provider Champion**

DAVIDSON, N.C., Jan. 22 -- One of 94 honorees, TeleSource was recognized as a 2009 Solution Provider Champion at the AT&T Alliance Channel sales kickoff meeting last week in Dallas, Texas. The Alliance Channel Program honorees achieved the highest sales and service rankings among their peer companies during 2008.

Solution Provider Champions combine their own value-added management and services with AT&T's network services, including mobility, VPNs, hosting, security, voice and data services.

TeleSource, Inc. delivers solutions with its Connect™ Telecom Expense & Inventory Management (TEIM) program, finding contractual rate variances, service optimization opportunities, and third party 'slamming and cramming' charges. Along with negotiating carrier service agreements and managing network deployments, TeleSource also operates a 24/7 Telecom Help Desk.

TeleSource Agent Partners have access to the latest carrier products and the opportunity to dramatically increase their revenues with sales of TeleSource Connect™ managed services. TeleSource's knowledgeable experts seek to educate agents on network sales opportunities and the principles of solution selling.

TeleSource is currently accepting 2009 agent applications and welcomes inquiries about how TeleSource a Connect™ TEIM solution could impact your businesses bottom line.
